

# Fall 2023 Social Science Colloquia

Nathaniel Blower, MWF 9:40am-10:30am  
(72941) HONOR 34001

How should we read the United States Constitution? As a 'living document' whose meaning can change and grow alongside changes and growth in American democratic society? Or as something whose meaning is more 'static', more 'objective'? Recently more than perhaps, it seems to be the second option that is preferred by justices of the Supreme Court of the United States (SCOTUS). But is it even possible to interpret the Constitution without injecting any life into it? And if it is possible, do the recent decisions of SCOTUS (on abortion and gun control, for instance) actually live up to this ideal? These questions, and a number of related political, social and philosophical questions, will be our focus in this colloquium.

## STEM in the News

Carrie Tomko, MF 10:45am- 11:35am

(7294) HONOR 34002 CDT  
cars... The challenges of feeding a growing population through technology in agriculture...!! As new research and technology emerge, resulting in a changing world. How are these innovations communicated to the media?

# Fall 2023 Social Science Colloquia

read a book, related to media, of their choice, and then they present the findings, as well as inquire to the other students through facilitation of a question and answer session.

## Honors: The Honors Tradition

Carrie Tomko, MWF 11:50am-12:40pm,  
(72950) HONOR 340003

In anticipation of the 50th anniversary of the Honors at The University of Akron, students who enroll in this colloquium will have the honor to research the history of The Williams Honors College, formerly known as the Honors College and the Honors Program. Using archival historical documents—digital and hardcopy—a timeline of key events will be developed, along with key moments and key people in the history of Honors, key faculty and staff, key alumni, keynote speakers, key events, and key individuals who have propelled The Williams Honors College to academic successes through its 50-year history. The information that is gathered by the students in this colloquium will be used to document the history and aid in celebratory plans for the year 2025.

## Winning Combinations in Health Behavior: Exploring Health Priorities

John Roncone, Tu (Hybrid), 5:15pm-6:30pm  
(74465) HONOR 340004

This social science discipline colloquium examines health behavior exploring health priority areas, such as, physical activity, stress management, and other dimensions of health and physical fitness. The priority areas explored will be beneficial to students reflecting on their own health behavior(s), quality of life/healthy life years/lifestyle management. Students will leave the course with a sound knowledge of key health components related to mind/body health, research as well as health behavior models/theories.
